SUMMARY

My name is Bill Watters, I am a full stack web developer with a deep passion for building tools to improve the lives of others. I offer a unique background in the caretaking of individuals with special needs and the security industry. This has made me excellent at working under immense pressure while showing compassion, communicating, and keeping an even temper when faced with challenges. I enjoy working as a full stack developer as I get the opportunity to further my knowledge of both ends of development. I have a passion for problem-solving, which made me gravitate towards software development and I am seeking a role that will elicit growth in my professional development.
